

ICARUS

The Information Catalyst for Aviation Services

97%

Demand end-to-end security and privacy for sharing data through a marketplace

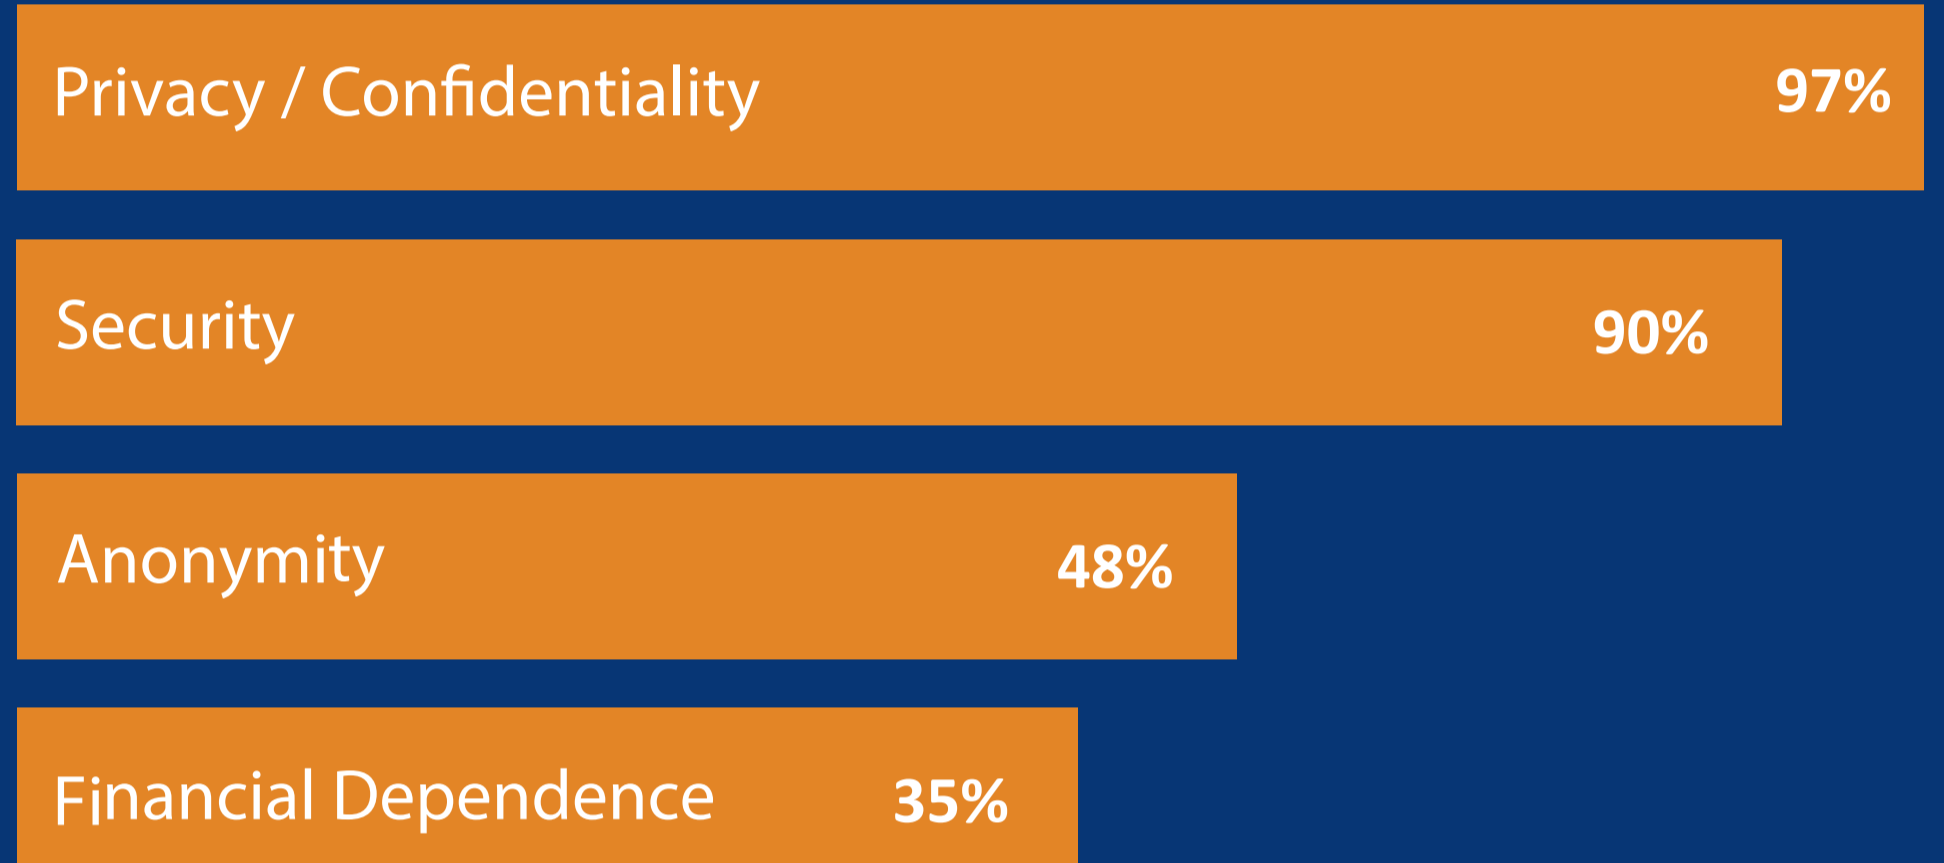

An Aviation Data And Intelligence Marketplace.

50%

Do not use a Big Data Analytics platform yet because of the cost, effort and lack of experience

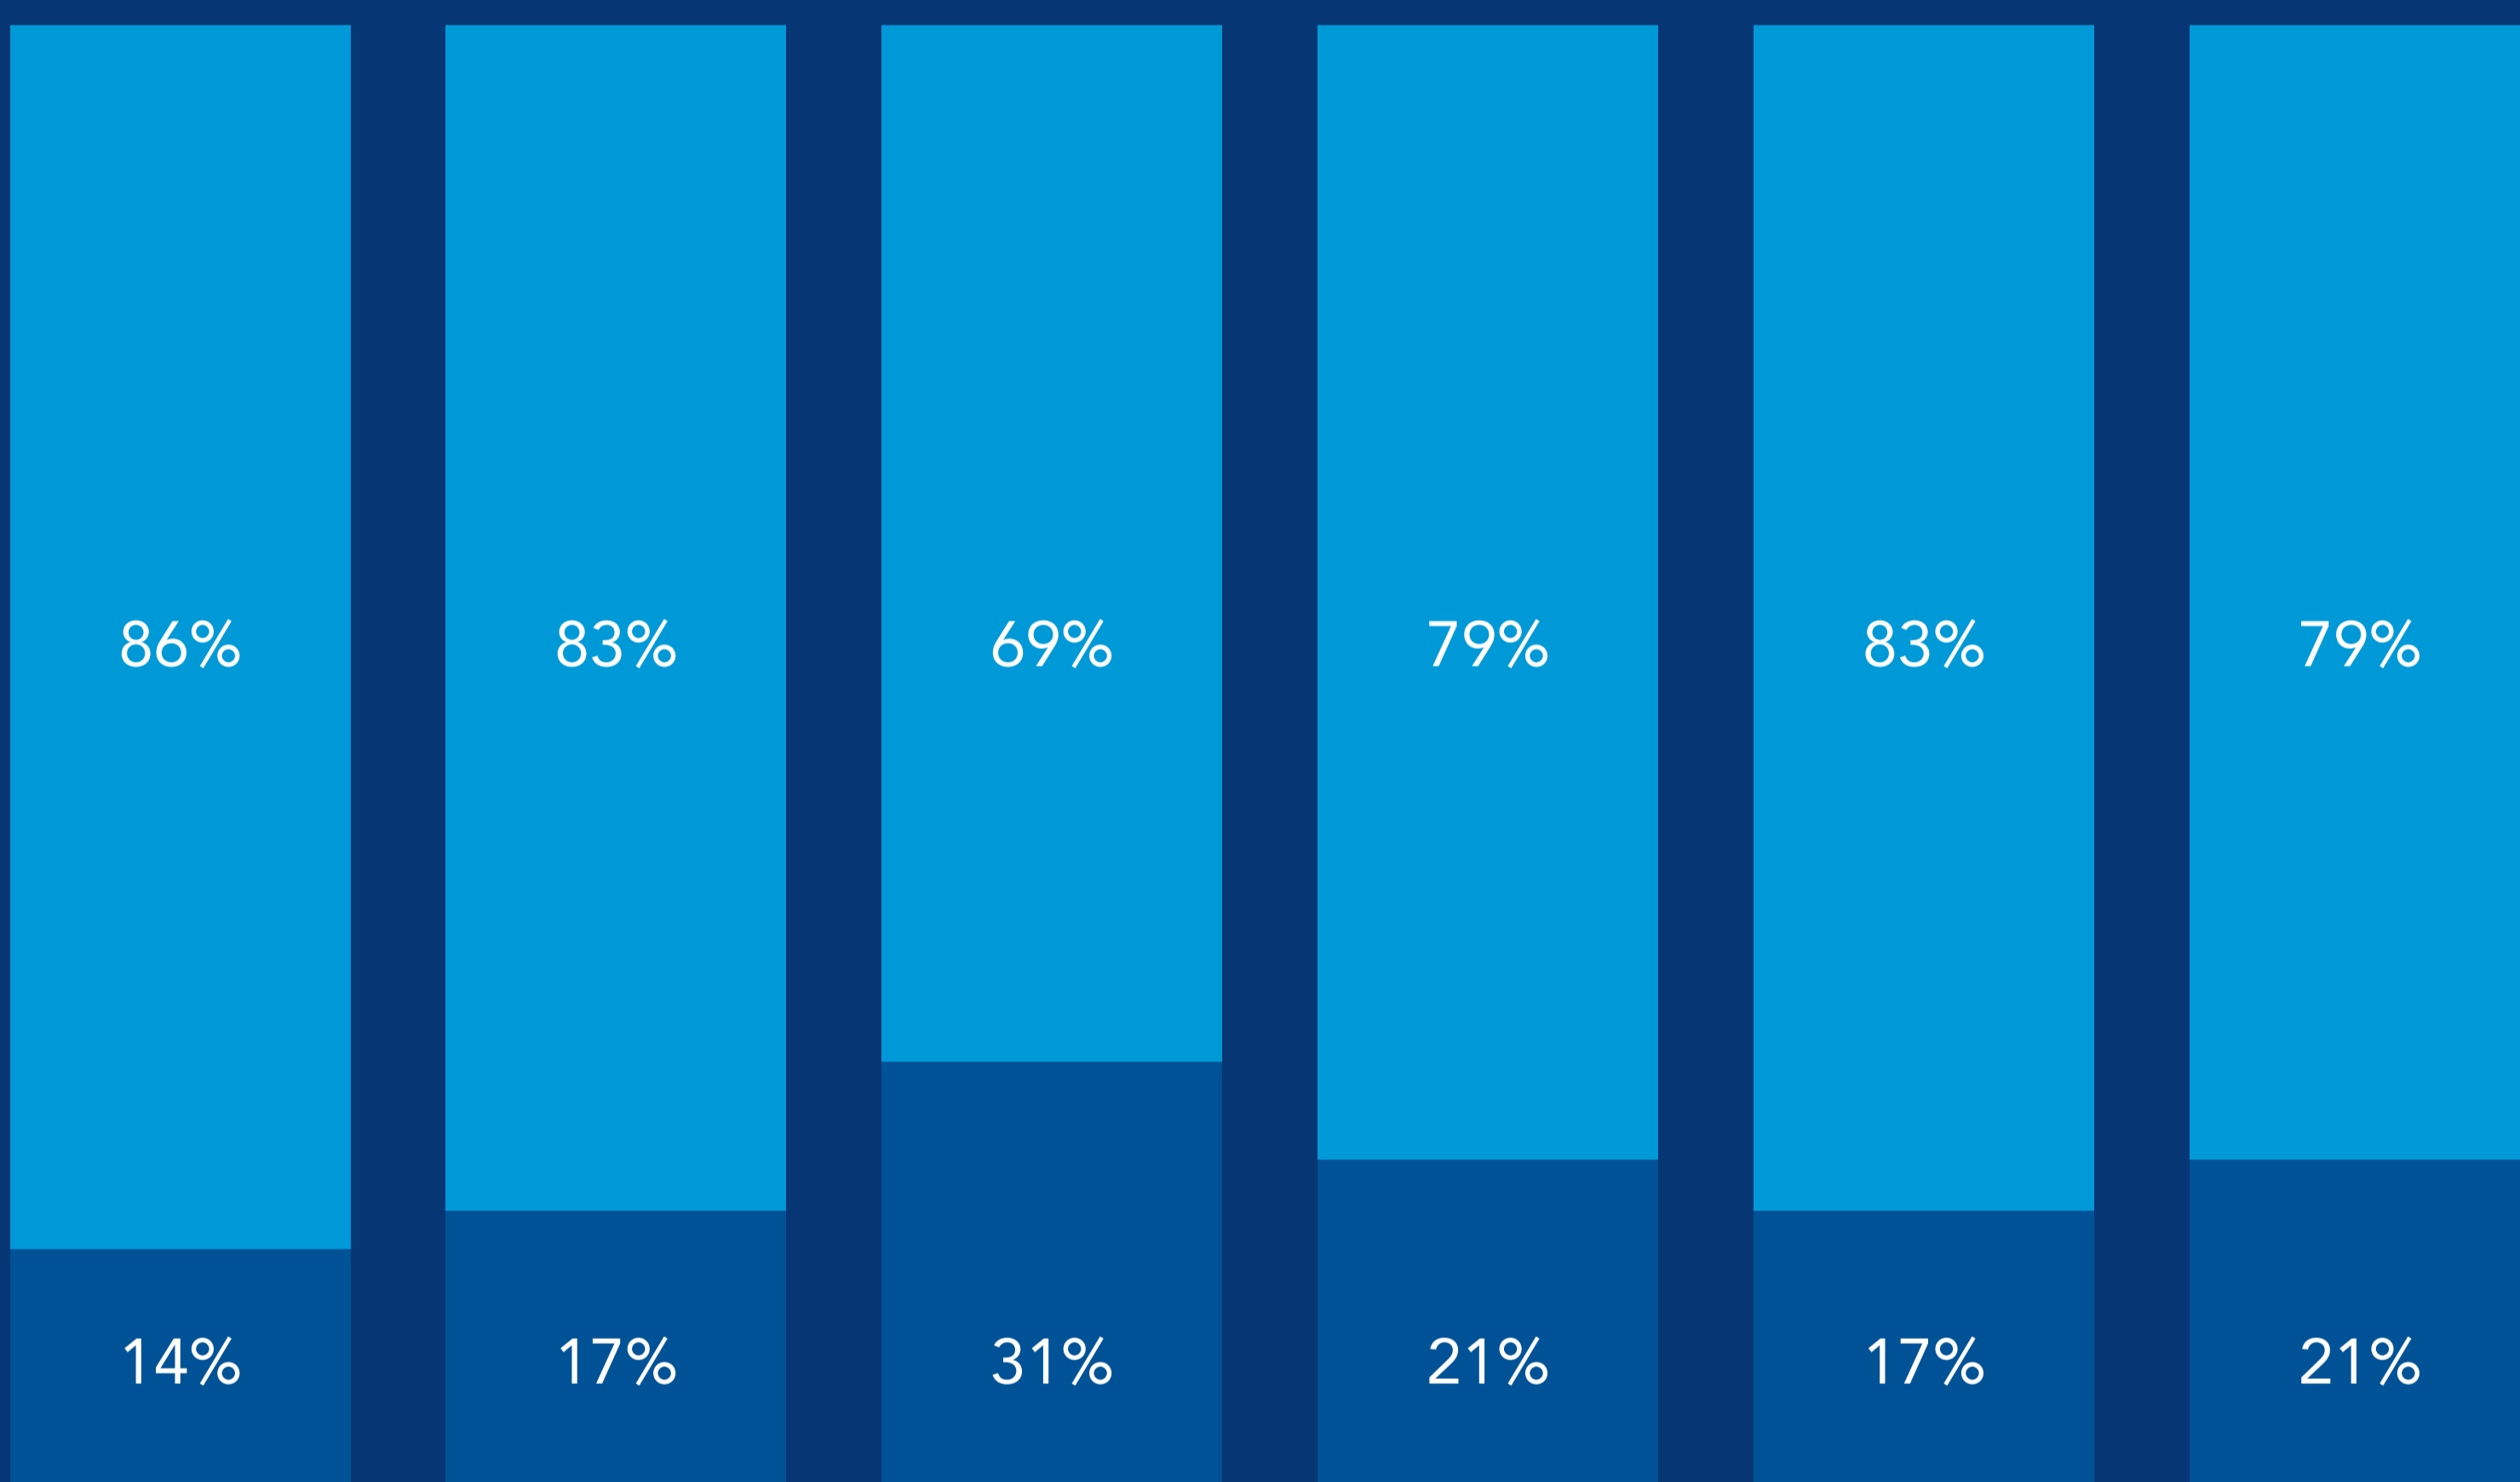

What are your concerns when it comes to data sharing through an intermediary?

Demand for ICARUS Features

● Interested

● Not Interested

A Secure Experimentation Playground for experimenting with datasets before purchase

A service that recommends similar datasets based on the datasets currently explored

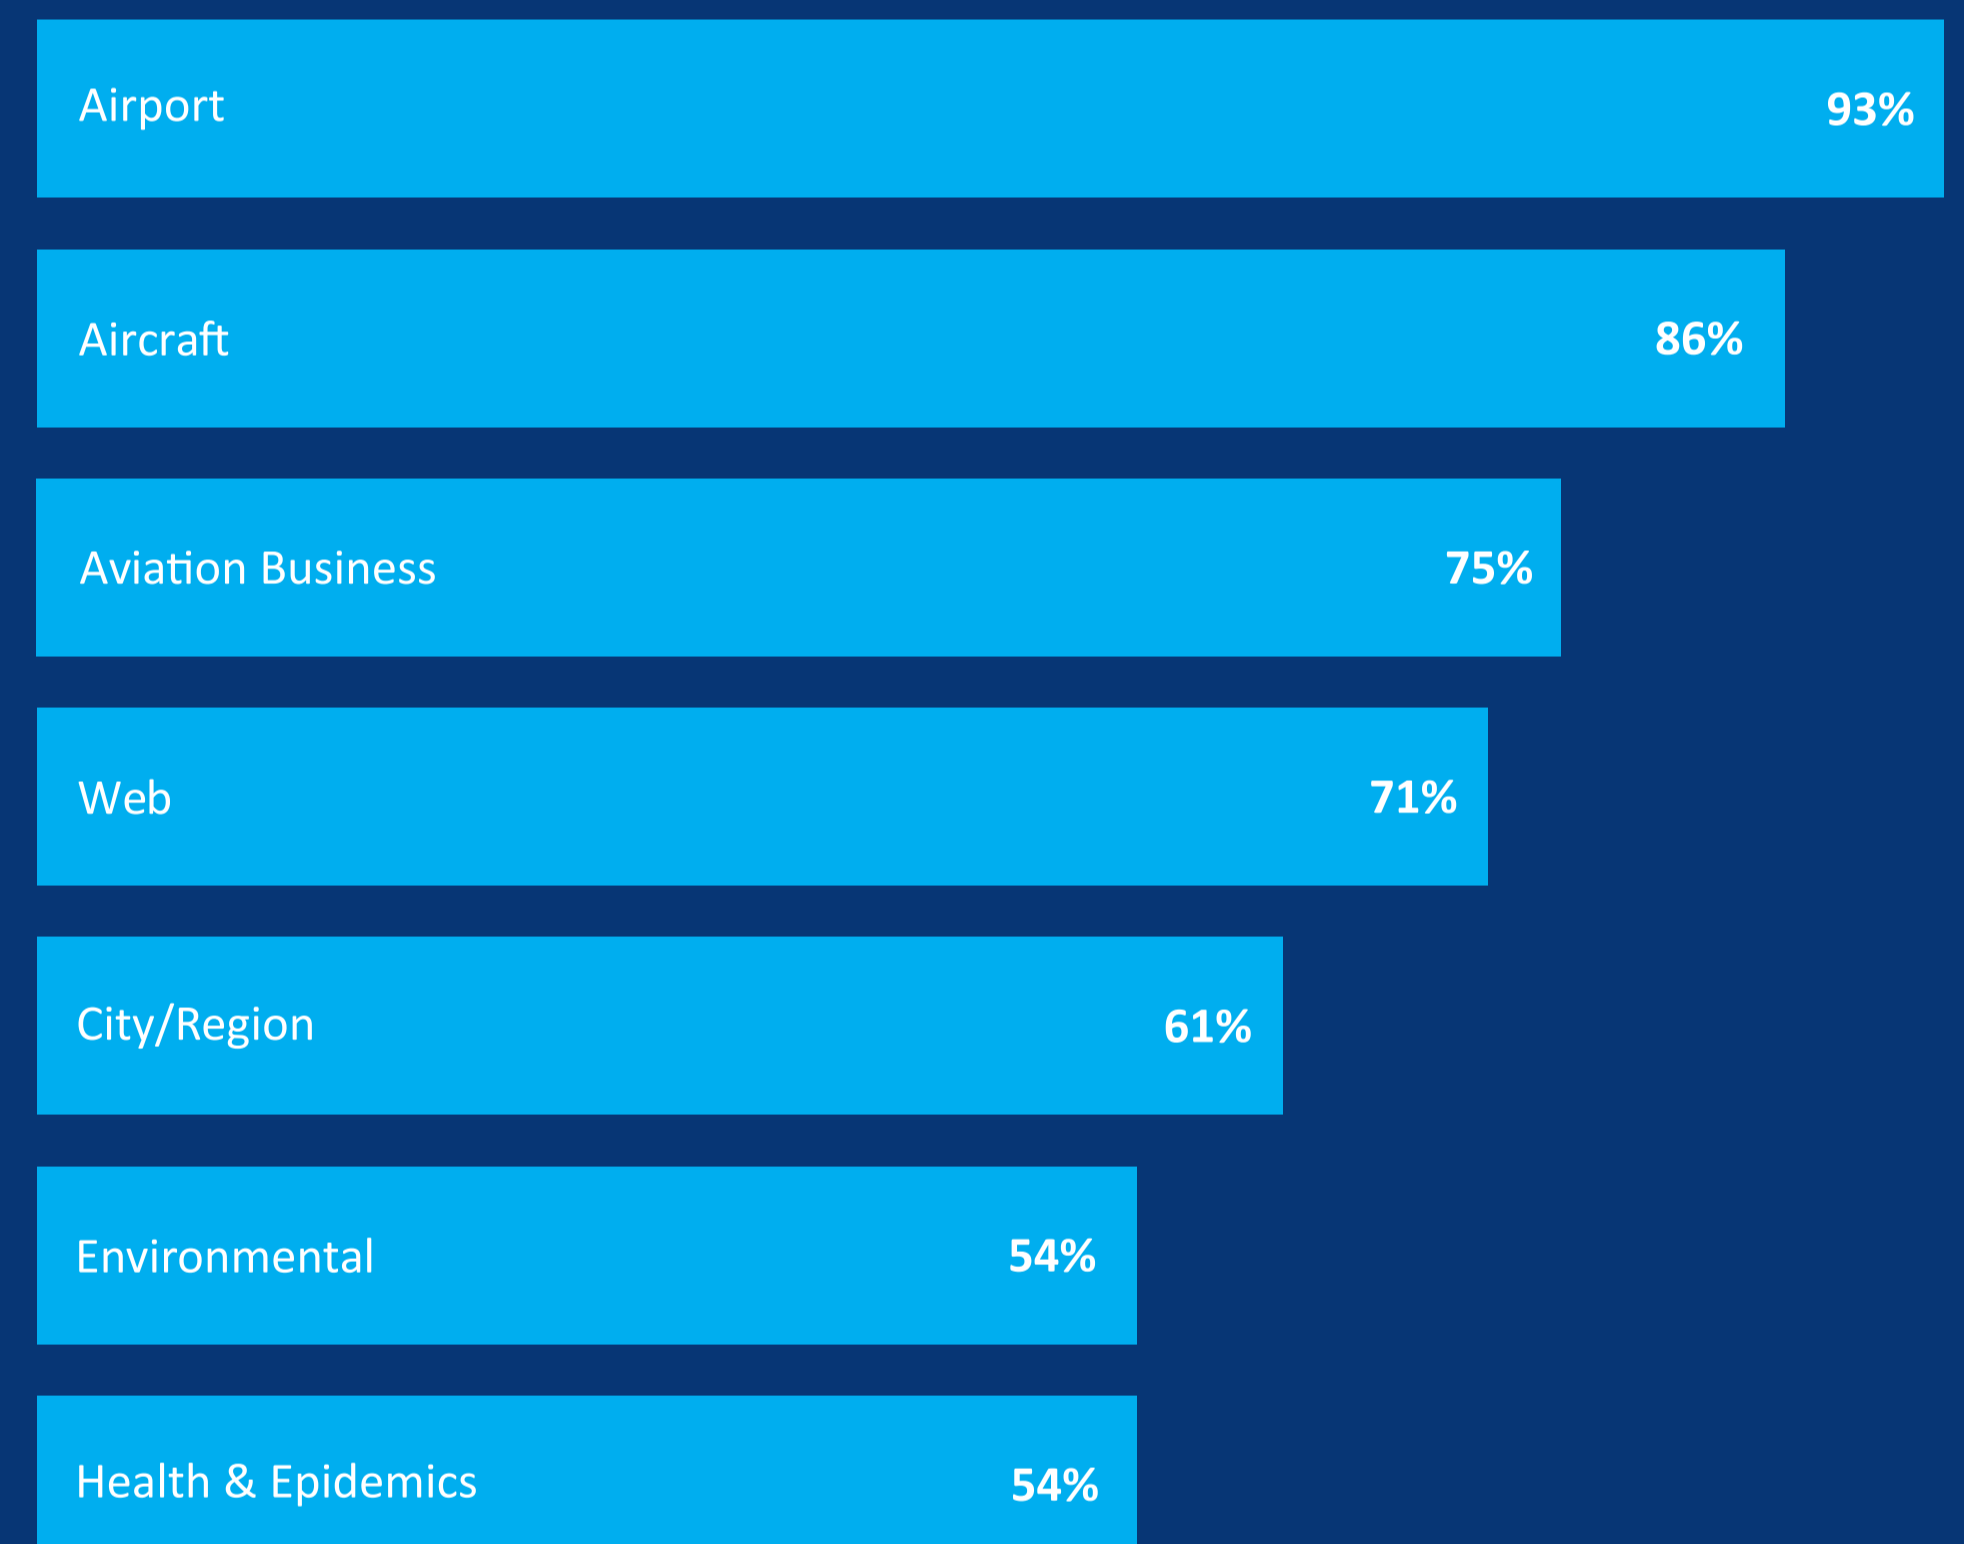

Data Notification Service that permits any stakeholder to post requests for specific datasets

Guaranteed specific agreements without intermediate third parties

Intuitive dashboard with interactive visualization capabilities

Semi-automated negotiation service between data/service owners and prospective 'customers'

What are the domains of data that you would be interested for the ICARUS Platform to contain?

Horizon 2020 - Grant #780792. ICT-14-2017: Big Data PPP: cross-sectorial and cross-lingual data integration and experimentation
